

NIKHIL TIWARI

Full-Stack MERN Developer | Node.js • React.js • Next.js • NestJS | 3+ Years Experience

+91-9625905712 | 8.nikhil3@gmail.com | Greater Noida, India | [linkedin.com/in/nikhil-tiwari-n1991](https://www.linkedin.com/in/nikhil-tiwari-n1991) | github.com/nikhil3891

PROFESSIONAL SUMMARY

Full-Stack MERN Developer who grew from intern to owning backend architecture end-to-end within two years — API contracts, DB schemas, versioning, security and code reviews. Over 3+ years, shipped 249+ REST APIs across fintech, payroll, CRM and e-commerce platforms, working with JWT/RBAC, Redis, BullMQ job queues and multi-tenant architecture. Now founder-engineer of RoadPass, a multi-tenant bus-booking SaaS platform built for sale and licensing to travel and bus operators — taking it from Business Requirements Document through to a live Dockerized backend, operator dashboards and mobile app.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Backend: Node.js, Express.js, NestJS, REST API Design, Worker Threads

Frontend: React.js, React Native, Next.js, Tailwind CSS, HTML5, CSS3

Databases: MongoDB, MySQL, MSSQL, PostgreSQL, Redis

ORM / Query Builders: Prisma ORM, Knex

Cloud & DevOps: AWS S3, AWS EC2, Docker, Google Drive API

Security & Auth: JWT, OAuth, RBAC, bcrypt, Helmet.js, Rate Limiting

Testing & API Tools: Jest, Postman, Swagger/OpenAPI

Architecture & Practice: Multi-Tenant Architecture, API Versioning (v1/v2), Middleware, Centralised Error Handling, System Design, Business Requirements Documentation (BRD), Agile/Scrum, SOLID Principles

Tools: Git/GitHub, JIRA, BullMQ, Socket.IO, dotenv

WORK EXPERIENCE

Founder-Engineer — RoadPass (SaaS Product)

Present

Remote

- Own product direction and full-stack delivery for RoadPass, a multi-tenant bus-booking SaaS platform built for sale and licensing to travel and bus operators — from Business Requirements Documentation through to a live, deployed system.
- Authored the complete Business Requirements Document (BRD) and versioned change-log addenda, covering RBAC permission matrices, tenant verification workflows, subscription billing and a 5-application product roadmap.
- Building the Node.js/Express modular-monolith backend (Docker, Redis, BullMQ job queues, Swagger/OpenAPI docs, JWT auth) alongside Next.js operator and admin web dashboards and a customer web app.

MERN Stack Developer | Devolyt Technologies Pvt. Ltd.

Oct 2025 – Mar 2026

Greater Noida

- Owned backend architecture for web and mobile apps — wrote API contracts, DB schemas and data-flow diagrams from scratch.
- Enforced v1/v2 API versioning, centralised error handling and reusable middleware; led Agile sprints and reviewed merge requests (GitLab MRs) before merge.

Junior Node.js Developer | Expnovature Tech Pvt. Ltd.

Dec 2024 – Jul 2025

Gurugram

- Built 35+ Node.js/Express.js REST APIs and a React.js frontend for a policy-surrender and bidding platform — submission forms, bid-listing UI and settlement flow.

Junior Node.js Developer | Azikya Software Solution Pvt. Ltd.

Jun 2023 – Nov 2024

Gurugram

- Delivered RESTful APIs (Node.js, MSSQL, Knex) for a multi-tenant payroll platform serving 3+ companies; automated payslip PDF generation for 200+ employees monthly via Google Drive integration.
- Worked across 4+ client projects covering AWS S3 and Google Drive integration, API versioning and global error handling.

Intern → Node.js Developer | Azikya Software Solution Pvt. Ltd.

Dec 2022 – Jun 2023

Gurugram

- Progressed from web intern to backend contributor, shipping Node.js/Express API modules following REST conventions and version-control workflows.

Site / QA-QC Engineer | Gannon Dunkerly Pvt. Ltd. | NCC Ltd. | Dev Dutt Construction Pvt. Ltd. **Nov 2015 – Mar 2022**

Bareilly, Nabhinagar, Bhatinda & Delhi

- Oversaw quality assurance and quality control on infrastructure/construction projects across multiple sites prior to transitioning into software development.

EDUCATION, CERTIFICATIONS & LANGUAGES

Bachelor of Technology (B.Tech) — Civil Engineering

K.N.G.D. Modi Engineering College, 2015

Certifications: Programming in Python • Postman API Testing

Languages: English (Professional Proficiency) • Hindi (Native)

KEY PROJECTS & IMPACT

RoadPass — Multi-Tenant Bus Booking SaaS In Development

Node.js, Express.js, MongoDB, Redis, BullMQ, Docker, Next.js, React.js, React Native, Tailwind CSS, Socket.IO, JWT

Customer Web (Live): bus-booking-users-page.vercel.app | Operator Dashboard (Live): operator-page-dashboard.vercel.app

- Authored a full Business Requirements Document and versioned change-log addenda covering 5 planned client applications, a complete RBAC permission matrix, tenant verification workflows, tiered subscription billing and a phased release roadmap.
- Building a Dockerized Node.js modular-monolith backend with Redis-backed seat locking, BullMQ job queues and Swagger/OpenAPI documentation; JWT authentication with registration and login flows tested end-to-end.
- Developing a Next.js customer web app and an Operator web dashboard (live) for bus companies and individual operators to manage their fleets, alongside a React Native customer mobile app carried over from an earlier build and being re-validated against the current BRD.

Safe EMI Locker safeemilocker.com

Node.js, Express.js, MongoDB, JWT, AWS S3, Helmet.js

- Shipped 249+ REST APIs for an EMI-based phone feature-control system: device locks, admin key generation, retailer access management and full audit trails.
- Built an e-commerce module for retailer-to-vendor electronics purchasing; secured with JWT, Helmet.js, rate limiting and multi-tenant RBAC.

Payment Management System 3 months

Node.js, MSSQL, Knex, Google Drive API, JWT, bcrypt

- Led backend for a multi-tenant payroll platform serving 3+ companies with full data isolation; automated payslip PDF generation for 200+ employees monthly.
- Used worker threads for CPU-intensive payroll batch jobs to keep the event loop free.

Weldarc CRM 4 months

Node.js, Express.js, MongoDB, JWT

- Built CRM backend for lead assignment, pipeline tracking and lifecycle management with real-time JWT-secured endpoints.
- Reduced API response time by ~30% through query optimisation and indexing.

Finn Mitra 4 months

Node.js, Express.js, MongoDB, JWT, Helmet.js

- Built production-grade fintech APIs for utility bill payments with strict validation and zero-tolerance error handling.
- Tuned query performance and aligned API contracts early with the frontend team to cut integration issues.

BrainyClock — Attendance System 4 months

Node.js, Express.js, MySQL, Swagger

- Designed a MySQL relational schema for multi-location attendance, shift and department tracking across 3+ global offices.
- Published full Swagger/OpenAPI documentation for every endpoint.
