

# NIKHEL TIWAARI

MERN Stack Developer | Node.js Backend Specialist | 3+ Years Experience

+91-9625905712 • 8.nikhil3@gmail.com • Greater Noida, India • [linkedin.com/in/nikhil-tiwari-n1991](https://www.linkedin.com/in/nikhil-tiwari-n1991) • [github.com/nikhil3891](https://github.com/nikhil3891)

## PROFESSIONAL SUMMARY

Dynamic MERN Stack Developer with 3+ years (including internship) building scalable, production-grade web and mobile applications. Deep expertise in Node.js (event loop, async/await, worker threads), Express.js, NestJS, React.js and React Native. Proficient in RESTful API design — v1/v2 versioning, pagination, centralised error handling, middleware patterns — applied across all projects. Hands-on with multi-tenant architecture, JWT/bcrypt/Helmet.js security, AWS S3, Google Drive API, and dotenv environment config management. Experienced in Agile/Scrum, PR reviews, Jest unit testing, and clean architecture. Passionate about delivering software that solves real problems.

## TECHNICAL SKILLS

### Backend

Node.js (Event Loop, Async/Await, Worker Threads), Express.js, NestJS

### Frontend

React.js, React Native, TypeScript, HTML5, CSS3

### Security & Auth

JWT, bcrypt, Helmet.js, Rate Limiting, RBAC, OAuth basics

### Cloud & Storage

AWS S3, Google Drive API

### Methodology

Agile/Scrum, Sprint Planning, PR Code Reviews SOLID Principles, Clean Architecture, Git Branching

### REST APIs

Versioning (v1/v2), Pagination, Middleware, Error Handling

### Databases

MongoDB, Mongoose, SQL/MSSQL, Sequelize, Knex Redis — caching concepts & basics

### Node.js Internals

Event Loop, Async/Await, Worker Threads dotenv / config-based environment management

### Testing & Tools

Jest, Postman, Swagger, JIRA, Git/GitHub, PDF Generation

### AI Tools

Cursor (AI-assisted development, used per company recommendation)

## WORK EXPERIENCE

### MERN Stack Developer • Devolyt Technologies Pvt. Ltd.

Dec 2025 – Mar 2026 • Greater Noida

- Architect scalable Node.js/Express.js backends; produce complete system design documents (API contracts, DB schemas, data-flow diagrams) for web and mobile apps.
- Enforce API standards: v1/v2 versioning, pagination, centralised error handling, reusable middleware — ensuring consistency and long-term maintainability across the codebase.
- Lead Agile sprints and PR reviews enforcing clean architecture, SOLID principles, and Git branching strategy.
- Leveraged AI-assisted development tools (Cursor IDE) as recommended by company management to accelerate coding workflows and maintain high code quality standards.

### Software Engineer • Radianys Technologies Pvt. Ltd.

Aug 2025 – Sep 2025 • Gurugram

- Built scalable NestJS APIs for an AI-enhanced VFX video records management system with clean architecture and MNC-level code standards.
- Achieved high test coverage with Jest unit tests; raised & reviewed PRs collaborating with global teams in Agile sprint cycles.
- Utilised Cursor (AI coding tool) as directed by management to enhance development speed while ensuring code reviews upheld quality benchmarks.

### Junior Node.js Developer • Expnovature Tech Pvt. Ltd.

Dec 2024 – Jul 2025 • Gurugram

- Delivered RESTful APIs (Node.js, MSSQL, Knex) for a multi-tenant payroll platform; built Google Drive integration and automated payslip PDF generation, cutting manual HR effort.
- Applied Node.js worker threads for CPU-heavy payroll batch processing — prevented event loop blocking and improved throughput. Secured with JWT, bcrypt, RBAC, Helmet.js & rate limiting.

- Designed multi-tenant architecture with ReactJS UI; managed dotenv configs across dev/staging/prod; applied v1/v2 versioning and SOLID principles throughout.

#### **Junior Node.js Developer • Azikya Software Solution Pvt. Ltd.**

Jun 2023 – Nov 2024 • Gurugram

- Built RESTful APIs across 4+ client projects with multi-tenant features, Google Drive & AWS S3 integration; secured with JWT, Helmet.js, and rate limiting.
- Applied v1/v2 versioning, pagination, global error handling, and dotenv config management across all modules; collaborated in Agile sprints with regular PR reviews.

#### **Intern → Node.js Developer • Azikya Software Solution Pvt. Ltd.**

Dec 2022 – Jun 2023 • Gurugram

- Progressed from web intern to backend contributor; built Node.js/Express API modules applying REST conventions and middleware patterns.

### **KEY PROJECTS & IMPACT**

---

#### **Safe EMI Locker — 4 months | Tech: Node.js, Express.js, MongoDB, JWT, AWS S3, Helmet.js [safeemilocker.com](https://safeemilocker.com)**

- Built complete backend for an EMI-based phone feature control system — managed device feature locks, admin key generation & distribution, retailer access, and full audit trails tracking every key transaction.
- Developed an e-commerce module enabling retailers to purchase electronics from vendors via mobile app, with vendor delivery management and a full admin oversight dashboard.
- Integrated AWS S3 for secure file storage; protected all endpoints with JWT, Helmet.js headers, rate limiting, and multi-tenant RBAC ensuring clean data isolation per retailer.

#### **Payment Management System — 3 months | Tech: Node.js, MSSQL, Knex, Google Drive API, JWT, bcrypt**

- Led backend of a multi-tenant payroll platform — multiple companies run on a single codebase with complete data isolation per tenant.
- Built Google Drive integration for employee document management and automated payslip PDF generation, eliminating manual HR overhead entirely.
- Used Node.js worker threads for CPU-intensive payroll computation — prevented event loop blocking and improved batch processing throughput. Secured with bcrypt, JWT, and RBAC.

#### **Finn Mitra — 4 months | Tech: Node.js, Express.js, MongoDB, JWT, Helmet.js**

- Developed production-grade fintech APIs for utility bill payments engineered for high reliability — financial transactions where errors are unacceptable.
- Optimised API response times via query tuning and error-handling middleware; secured endpoints with JWT, Helmet.js, and rate limiting to prevent fraud and abuse.
- Collaborated with frontend team to align API contracts, reducing integration bugs and improving overall application load times.

#### **Weldarc CRM — 4 months | Tech: Node.js, Express.js, MongoDB, JWT**

- Built CRM backend for lead assignment, pipeline tracking & lifecycle management — streamlined the sales process with real-time, JWT-secured data handling.
- Improved API response efficiency through query optimisation; implemented v1/v2 versioning and structured error responses for reliable frontend integration.

#### **Hindu Business Directory — 2 months | Tech: Node.js, Express.js, MongoDB [hindubusinessdirectory.com.au](https://hindubusinessdirectory.com.au)**

- Developed Node.js/Express APIs for an Australian business listing platform — versioned endpoints (v1/v2), paginated results for large datasets, and service management APIs.

#### **BrainyClock – Employee Attendance System — 4 months | Tech: Node.js, Express.js, MongoDB**

- Built APIs for real-time attendance, department & shift management across global multi-location offices; multi-tenant architecture with independent data per organisation.

### **EDUCATION & CERTIFICATIONS**

---

B.Tech in Engineering | K.N.G.D. Modi Engineering College, 2015 | Certifications: Programming in Python • Postman API Testing
