

NIKHEL TIWAARI

MERN Stack Developer | Node.js Backend Specialist | 3+ Years Experience

+91-9625905712 • 8.nikhil3@gmail.com • Greater Noida, India • [linkedin.com/in/nikhil-tiwari-n1991](https://www.linkedin.com/in/nikhil-tiwari-n1991) • github.com/nikhil3891

PROFESSIONAL SUMMARY

MERN Stack Developer with **3+ years** (including internship) building scalable, production-grade web and mobile applications. Deep expertise in **Node.js** (event loop, async/await, worker threads), **Express.js**, **NestJS**, **React.js** and **React Native**. Proficient in **RESTful API design** — v1/v2 versioning, pagination, centralised error handling and middleware patterns — applied across all projects. Hands-on with **multi-tenant SaaS architecture**, JWT/bcrypt/Helmet.js security, **AWS S3**, **Redis**, **BullMQ**, Google Drive API and dotenv config management. Experienced in Agile/Scrum, PR reviews, Jest unit testing, SOLID principles and clean architecture.

TECHNICAL SKILLS

Backend: Node.js • Express.js • NestJS • Worker Threads • Cloud & Storage: AWS S3 • Google Drive API • dotenv
Async/Await • Event Loop
Frontend: React.js • React Native • Next.js • TypeScript • Testing & Tools: Jest • Postman • Swagger • BullMQ •
HTML5 • CSS3 Git/GitHub • JIRA • PDF Generation
Databases: MongoDB • Mongoose • MySQL • MSSQL • Methodology: Agile/Scrum • SOLID Principles • Clean
Sequelize • Knex • Redis Architecture • PR Reviews • System Design
REST APIs: v1/v2 Versioning • Pagination • Middleware • AI Tools: Cursor IDE (company-recommended AI-assisted
Centralised Error Handling development)
Security & Auth: JWT • bcrypt • Helmet.js • Rate Limiting •
RBAC • OAuth

WORK EXPERIENCE

MERN Stack Developer • Devolyt Technologies Pvt. Ltd.

Oct 2025 – Mar 2026 • Greater Noida

- Architected and delivered scalable **Node.js/Express.js** backends; produced complete system design documents — API contracts, DB schemas, data-flow diagrams — for web and mobile apps.
- Enforced API standards: **v1/v2 versioning**, pagination, centralised error handling, reusable middleware across the entire codebase, ensuring long-term maintainability.
- Led **Agile sprints** and PR reviews enforcing clean architecture, SOLID principles and Git branching strategy.
- Leveraged **Cursor IDE** (company-directed) to accelerate delivery while maintaining high code quality benchmarks.

Software Engineer • Radianys Technologies Pvt. Ltd.

Aug 2025 – Sep 2025 • Gurugram

- Built and maintained scalable **NestJS** APIs for an AI-enhanced VFX video records management system with clean architecture and MNC-level code standards.
- Achieved high **Jest** test coverage; raised & reviewed PRs collaborating with global teams across Agile sprint cycles.

Junior Node.js Developer • Expnovature Tech Pvt. Ltd.

Dec 2024 – Jul 2025 • Gurugram

- Designed and delivered **RESTful APIs** (Node.js, MSSQL, Knex) for a **multi-tenant payroll platform**; integrated **Google Drive** and automated payslip PDF generation, eliminating manual HR overhead.
- Implemented **Node.js worker threads** for CPU-intensive batch payroll processing — prevented event loop blocking and improved throughput. Secured with **JWT**, **bcrypt**, **RBAC** and Helmet.js.
- Managed **dotenv** configs across dev/staging/prod environments; applied v1/v2 versioning and SOLID principles throughout.

Junior Node.js Developer • Azikya Software Solution Pvt. Ltd.

Jun 2023 – Nov 2024 • Gurugram

- Developed and deployed **RESTful APIs** across **4+ client projects** with multi-tenant features, **Google Drive** & **AWS S3** integration; secured with JWT, Helmet.js and rate limiting.
- Applied v1/v2 versioning, pagination, global error handling and dotenv config management; collaborated in Agile sprints with regular PR reviews.

Intern → Node.js Developer • Azikya Software Solution Pvt. Ltd.

Dec 2022 – Jun 2023 • Gurugram

- Progressed from web intern to backend contributor; built and shipped **Node.js/Express** API modules applying REST conventions, middleware patterns and version control workflows.

KEY PROJECTS & IMPACT

Safe EMI Locker — 4 months | safeemilocker.com

Node.js, Express.js, MongoDB, JWT, AWS S3, Helmet.js

- Built and launched complete backend for EMI-based phone feature control — device locks, admin key generation & distribution, retailer access management, full audit trails.
- Developed e-commerce module enabling retailers to purchase electronics from vendors via mobile app with vendor delivery management and admin dashboard.
- Integrated **AWS S3**; protected all endpoints with **JWT**, **Helmet.js**, rate limiting and **multi-tenant RBAC** with clean data isolation per retailer.

Payment Management System — 3 months

Node.js, MSSQL, Knex, Google Drive API, JWT, bcrypt

- Led and delivered backend for a **multi-tenant payroll platform** — multiple companies on a single codebase with complete data isolation per tenant.
- Implemented **Google Drive** integration for document management and automated payslip PDF generation, eliminating manual HR overhead.
- Utilised **Node.js worker threads** for CPU-intensive batch payroll computation, preventing event loop blocking. Secured with **bcrypt**, **JWT** and RBAC.

Finn Mitra — 4 months

Node.js, Express.js, MongoDB, JWT, Helmet.js

- Engineered production-grade fintech APIs for utility bill payments — zero-error financial transactions at scale.
- Optimised API response times via query tuning; secured endpoints with **JWT**, **Helmet.js** and rate limiting; collaborated with frontend team to align API contracts, reducing integration bugs.

Weldarc CRM — 4 months

Node.js, Express.js, MongoDB, JWT

- Architected and shipped CRM backend for lead assignment, pipeline tracking & lifecycle management — streamlined sales with real-time JWT-secured data handling.
- Improved API efficiency via query optimisation; implemented **v1/v2 versioning** and structured error responses for reliable frontend integration.

BrainyClock – Attendance System — 4 months

Node.js, Express.js, MySQL, Swagger

- Built APIs for real-time attendance, shift & department management across global multi-location offices; **multi-tenant** architecture with independent data per organisation.
- Designed **MySQL** relational schema for structured attendance records; produced full **Swagger** API documentation for all endpoints.

Hindu Business Directory — 2 months |

hindubusinessdirectory.com.au

Node.js, Express.js, MongoDB

- Developed and deployed Node.js/Express APIs for an Australian business listing platform — v1/v2 versioned, paginated endpoints handling large datasets.

TravelSeat – Travel Booking SaaS | In Development

Node.js, Express.js, MongoDB, React.js, Redis, BullMQ, JWT, AWS S3

- Designing and building a **multi-tenant SaaS platform** for daily commute and long-distance travel seat booking — modular monolith with auth, bus, booking, payment, notification and tenant modules.
- Implementing **Redis** seat locking & sessions, **BullMQ** queues for email/SMS/invoice PDF, **JWT+RBAC** (admin/operator/passenger), Zod validation, **AWS S3** for ticket storage.

EDUCATION & CERTIFICATIONS

- B.Tech in Engineering | K.N.G.D. Modi Engineering College, 2015
- Programming in Python — Certified
- Postman API Testing — Certified

LANGUAGES

English (Professional Proficiency) • **Hindi** (Native)
